

CLEARVIEW
Farm
DEVELOPED BY THE ATKINS GROUP

Welcome to Clearview Farm.

This is where the heartland's history meets farming's future. Established over a century ago, the landscape is developing with opportunity—through regenerative agriculture and community engagement.

Community grows here.

At Clearview Farm, people of all ages are invited to enjoy beautiful surroundings and educational opportunities.

- A visually stunning, photo-ready destination during all four seasons
- Field trips, demonstrations, and internships for students
- Abundant testing ground for non-native crops
- Commercial and academic partnerships to strengthen and enrich our local economy

Possibilities grow here.

We're cultivating big ideas. Located in northwest Champaign, Clearview Farm will feature a number of beautiful non-native crops year-round—all to be enjoyed by the community, all to be harvested.

For example:

- Sunflower
- Flax
- Buckwheat
- Red Clover
- Alfalfa

See you at the Farm!
