Farm

DEVELOPED BY THE ATKINS GROUP

About Wheat

- Wheat is a cereal crop that belongs to the grass family and is a notable staple crop around the world.
- Second to corn and soybeans, wheat is the third largest field crop in the United States. Kansas is the nation's top producing wheat state.
- The national average wheat yield is around 50 bushels per acre (1 bushel = 60 pounds).

Uses

- Human Consumption
 - Flour— bread, cakes, etc.
 - Wheat Bran— muffins, breads, breakfast cereals
 - Semolina— pasta, sweet puddings, couscous
 - & more!

Fast Facts

- Each year, Kansas produces enough wheat to make 36 billion loaves of bread.
- The U.S. uses about half of the wheat grown in the country.
- Wheat is grown in 42 states.

Wheat at Clearview Farm

- Clearview Farm's wheat will turn golden color in mid to late June.
- After harvesting in early July, our wheat is sold to a local elevator.
- A crop of buckwheat will be planted after the wheat is harvested.
